Singleturn Wirewound Potentiometer

Series RP22/23

The RP22/23 potentiometers in 22 mm metal housing are suitable for applications where an accurate and compact sensor with high electrically effective rotation angle is required.

- Accurate wirewound potentiometer
- With or without mechanical end stop (320° / 360°)
- Very high electrically effective angle of rotation 355° ±5°
- Compact sensor with 12 mm installation depth
- With many options

The RP22/23 potentiometer series (RP23 with mechanical end stop) is a multitalent which is adaptable for a wide range of applications and is often used as a feedback sensor in valve control systems. In addition, the sensor convinces by its very good accuracy.
